Linux • Mac • Amazon AWS

### WEB TECHNOLOGIES

HTML | CSS | JS • PHP • SQL •  
JSON | REST • Photoshop •  
Illustrator • Python basics

### OTHER

flexibility • solicitude • team  
leading • agile environment

# MICHAL ZELINKA

## ADDITIONAL INFORMATION

## TIMELINE

2014

### Mendel University

Acquired Master Degree in a field of Economic Informatics. Studying this merge of two major spheres of business allows me to get in touch with many interesting topics like general business management and planning, marketing, project management, business economics, programming theory and techniques and some more.

Both of my Bachelor and Diploma theses are oriented technically and practically. The first mentioned analyses a process of projecting and deployment of a converged network through the entire company area; the Diploma thesis relates to a usage of an augmented reality for marketing purposes and propagation with a practical example.

2013

### Sygie Travel || Tripomatic

Came in touch with an enthusiastic group of skillful developers and country-hoppers working on a cool project having ambitions to help others while on a move to discover new destinations. I'm responsible for the complete iOS deployment part, mobile projects specs, user experience part, but the everyday improvements-hunting allows me to extend my experience in way more areas.

2012

### iMakers

Began a collaboration with a growing IT business-related company. Acquired a lot of experience with project leadership and workflow management same as with mobile and web applications development.

## KEYWORDS

PROJECT MGMT & PLANNING •  
BUSINESS MANAGEMENT •  
MARKETING • PROCESSES •  
ENGINEERING • DEPLOYMENT

2010

### it2b

Long-running practice with a progressive young IT company where I came in touch with many aspects of every-day events. The company itself concerns on providing IT services and support to other companies oriented to different business, thus allowed me to gain some experience in project processes and low-level management, team work and IT consulting.

2007

### Miranda IM project

Began with a development of function-extending plugins for popular Miranda Instant Messenger (mainly aimed on UX, utilities and communication protocols).

### SSITSP Purkynova

Proceeded an IT-related study program Information and Database Systems. Starting with high school studies, programming became a very important concern, no matter what platform it covered. Interest in wide familiarization with a spread of technologies came as an effect.

## INTERESTS

### Project management/planning

I'm personally interested in looking for new ideas, discovering ways to solve things, brainstorming, implementing vital thoughts into practice, on both managing or operative level. I've got some basics in these disciplines and I'd be pleased to gain more practice and precision and grow my good feelings about a great work I could do.

### Dedicated project to take care of

As a person interested in progressive start-ups and new, yet unseen ideas, I would be pleased to stand back of some interesting project providing a specific public service or interest with a great perspective. More expressively, this would be something I could somehow live and breathe for, and take care of. No matter whether this would be handled as a part of career performance or just a personal free-time activity.
